Dear Dr. El Miedany,

Thank you for prescribing "Etanercept" for me, it has made a vast amount of difference to my quality of life. Before taking this medication I would be in constant pain and nothing seemed to help, having had arthritis for thirty six years. I am aware it has highs and lows but as time goes on the lows become more frequent and more painful, consequently, I was not looking forward to getting "Older", until now. My mobility is better by about seventy five/ eighty percent and my outlook on life is more positive. I still have some pain but it is now bearable most of the time.

Yours sincerely,
